CONCLUSION

With the outreach done by John Pofi Foundation (**JPF**) in collaboration with John Pofi Foundation Medical Centre Fudawa Jos North LGA (**JPFMC**) to support the people of Fudawa community with free dental care and support them with some relief materials to enhance their dental health. More so, we used the same medium to evangelized and remind them of Jesus Christ.

RECOMMENDATION

1. I suggest for yearly medical outreach to less privilege as a medium of evangelism and by doing so it's a means to promote the John Pofi foundation (**JPF**) Aims and Objectives.
2. I suggest for a yearly budget proposal in respect to the event and by doing so, that will make a lot of donors both local and international, local and international non-governmental organizations to key in to the aims and objectives of the foundation and that will promote the foundation.
3. I suggest for a comprehensive quarterly and yearly financial report and budget pertaining events like this and by that it will build a better infrastructure for the foundation.
4. I suggest for more medical outreach to promote John Pofi Foundation Medical Centre and the main body (John Pofi Foundation).
